A-304	.540	.355	.540	27	165
A-682	.875	.500	.875	13	100

Ball & Socket beads are concave on one end and convex on the other.  
 When beads are strung convex to concave on the wire, the wire can flex or bend and still maintain the ceramic insulated conductor.

These items are standard tooling. Please call for quotation on your quantity and delivery information.
